

**The ARISTOCRATS**  
**Freeze! Live in Europe 2020**  
**Boing Music**  
Genre: Fusion Metal

Fourth live album and four studio records, an almost mathematical progression. The Aristocrats are a war machine, relentless, virtuosos of their respective instruments, they impressed the audience with their skill and live they are highly engaging, it is not just a question of skill, because if the communicative side is lacking, people at the long does not follow you. By achieving such a goal, this supergroup has shown that it has entered people's hearts.

This new record consists of just six tracks for an hour of instrumental music. It ranges from metal to prog, without neglecting blues and country, with a very fusion spirit, many improvisations and executive refinements pitted like candy. The record swirls like a carousel and it's hard not to admire everyone's talent. However, the greatest strength of these three "jugglers" is that they have composed beautiful music, which certainly serves to highlight their skill, but which can be listened to with pleasure.

Perhaps for a band that has only made four studio albums, as many lives could be a bit many, but no one is obliged to buy them, certainly those who love these artists will not be disappointed. GB
